

TIMBERLITE Access Mat

Does your project need the toughness of a timber mat at the cost of 3-Ply and CLT mats?

After two years of development and testing in the field, YAK ACCESS is proud to include the TIMBERLITE access mat in our comprehensive line of site access products and services.

Ideal for powerline contractors, TIMBERLITE mats have found the sweet spot between 3-Ply or CLT mats and timber mats. Made of pine middle timbers and mixed hardwood outside timbers, these mats are light, durable, and flexible enough to contour to the ground below.

KEY BENEFITS OF TIMBERLITE

LIGHT

Because TIMBERLITE is 50 percent lighter than traditional timber mats, you save on freight costs. These mats are also lighter and more durable than 3-Ply access mats, giving you more options for minimizing impact on the ground below.

DURABLE

You face a wide range of conditions on a right-of-way. TIMBERLITE is more durable than 3-Ply and CLT mats, so you can use it in a larger variety of situations without upgrading to more expensive timber mats. These stout mats are also harder to break, therefore leaving less potential clean up at the end of the project.

FLEXIBLE

TIMBERLITE contours to the ground, allowing strategic placement of temporary roads for heavy equipment and trucks to cross smoothly. Because they flex when you drive, these mats won't shift or lift when equipment crosses.

ADVANTAGES OVER THREE-PLY MATS

- ✓ Lighter
- ✓ More durable
- ✓ Suitable for a wider range of terrain
- ✓ Gapless, meaning the mats will not pick up mud and get heavier

ADVANTAGES OVER CLT MATS

- ✓ More flexible
- ✓ More durable
- ✓ Suitable for a wider range of terrain

ADVANTAGES OVER TIMBER MATS

- ✓ Lighter
- ✓ Less expensive
- ✓ More cost-effective material composition

WHEN TO USE **TIMBERLITE** MATS

Because they are so versatile, powerline contractors and construction crews can use TIMBERLITE mats in a broad range of dry to semi-wet scenarios—including semi-swampy conditions that 3-Plys or CLT mats can't handle. They are ideal for both flat and uneven terrain but less suitable for mountainous areas. For optimal performance, use these mats when vehicle traffic will mostly consist of rubbered-tired equipment.

STABLE ROAD FOR **SAFER ACCESS**

Unlike any other type of mat, TIMBERLITE's flexible structure and ability to conform to the ground below ensure a secure ride every time. Whether you're moving heavy equipment or driving your pickup to and from the site every day, you won't have to worry about damage caused by mats popping up or shifting over time. With TIMBERLITE, your temporary roadway will stay stable and straight until project completion.

PRODUCT DETAILS

Dimensions	Average mats per load	Average weight
4' x 4.5" x 14'	36	1,285 lbs.
8' x 4.5" x 14'	21	2,200 lbs.

Materials: Pine and mixed hardwood

GET TIMBERLITE FOR YOUR NEXT PROJECT

When the right of way calls for an access solution more durable and flexible than a traditional timber mat but doesn't need the heavy-duty qualities—and expense—of 3-Ply and CLT mats, find the sweet spot with TIMBERLITE.
